

## **Scenario + Actions**

### **1. Signed ESA – No Onboarding Activity Yet**

#### **Scenario**

- ESA uploaded and fully executed
- No onboarding call scheduled
- Partner has no prior technical enablement

#### **Next Best Steps**

1. Schedule onboarding kickoff call within 5 business days
2. Assign solutions engineer / technical owner
3. Send onboarding prep email with agenda + prerequisites
4. Create onboarding task in CRM

#### **Risks to Flag**

1. Partner churn due to lack of engagement post-signature
  2. Delayed time-to-value reducing expansion likelihood
  3. Deal stall between ESA and first usage
- 

### **2. Signed ESA – Partner Has Prior Deal History (Reactivated)**

#### **Scenario**

- ESA signed
- Partner had prior stalled or lost opportunity
- Previous notes mention slow response or misalignment

#### **Next Best Steps**

1. Review historical objections from CRM
2. Schedule alignment call to revalidate goals
3. Tailor onboarding based on past blockers
4. Log “reactivation” status in CRM

#### **Risks to Flag**

1. Same historical blockers re-emerging
2. Internal partner skepticism about rollout

3. Over-assuming readiness based on ESA alone
- 

### **3. ESA Signed – Missing Key Stakeholder Information**

#### **Scenario**

- Contract lists legal signer only
- No identified technical or business owner on partner side

#### **Next Best Steps**

1. Request stakeholder map from partner
2. Identify technical decision maker (TDM)
3. Update CRM contact roles
4. Delay onboarding until ownership is clear

#### **Risks to Flag**

1. Misaligned expectations during onboarding
  2. Slow decision-making due to unclear ownership
  3. Email follow-ups going to non-operators
- 

### **4. ESA Signed – External Signal Indicates Org Change**

#### **Scenario**

- ESA uploaded
- Research Agent finds recent layoffs, acquisition, or reorg
- Partner website / news confirms shift

#### **Next Best Steps**

1. Validate current priorities with partner
2. Confirm budget and ownership post-org change
3. Adjust onboarding scope if required
4. Flag account as “at-risk” in CRM

#### **Risks to Flag**

1. Contract deprioritized due to internal changes
2. Stakeholders no longer in role
3. Delayed or canceled onboarding

---

## 5. ESA Signed – Technical Complexity High

### Scenario

- Contract includes multi-product usage
- Partner tech stack is non-standard
- Past deals required heavy SE involvement

### Next Best Steps

1. Escalate to technical account planning
2. Schedule architecture deep-dive
3. Attach technical checklist to opportunity
4. Track SE engagement in CRM

### Risks to Flag

1. Under-scoped onboarding effort
2. Engineering bandwidth constraints
3. Delayed production readiness

---

## 6. ESA Signed – Fast-Moving Partner, High Urgency

### Scenario

- ESA signed with aggressive go-live language
- Partner emails asking for “ASAP” enablement
- External funding or launch imminent

### Next Best Steps

1. Prioritize onboarding within 48–72 hours
2. Fast-track access provisioning
3. Send high-priority follow-up email
4. Mark opportunity as “time-sensitive”

### Risks to Flag

1. Over-promising timelines
2. Internal teams not aligned on urgency
3. Quality issues due to rushed onboarding

---

## 7. ESA Signed – No Prior Relationship / New Logo

### Scenario

- Brand new partner
- No historical CRM data
- No known champions

### Next Best Steps

1. Send structured welcome + intro email
2. Schedule discovery + onboarding combo call
3. Capture success criteria explicitly
4. Create baseline partner profile in CRM

### Risks to Flag

1. Unknown decision-making dynamics
2. More education required than assumed
3. Higher early-stage churn risk

---

## 8. ESA Signed – Contract Terms Imply Immediate Follow-Up

### Scenario

- ESA includes clauses like:
  - “Enablement within 30 days”
  - “Launch milestone required”

### Next Best Steps

1. Validate timeline obligations against contract
2. Create compliance milestone tasks
3. Notify account owner of term-driven actions
4. Track SLA deadlines

### Risks to Flag

1. Contractual non-compliance
2. Legal / escalation risk
3. Missed revenue recognition milestones

---

## 9. ESA Signed – Internal Sales Motion Incomplete

### Scenario

- ESA uploaded
- CRM opportunity still marked “Negotiation” or “Contracting”
- Required post-sale fields missing

### Next Best Steps

1. Update opportunity stage to “Closed–Won”
2. Trigger handoff to post-sales / onboarding
3. Validate required CRM fields
4. Send internal handoff summary

### Risks to Flag

1. Broken internal reporting
2. Missed handoffs between teams
3. Downstream automation not firing

---

## 10. ESA Signed – Ideal Expansion Candidate Detected (Stretch Scenario)

### Scenario

- Partner usage intent is broad
- History of expansion in similar accounts
- External growth signals detected

### Next Best Steps

1. Flag expansion potential in CRM
2. Add follow-up task post-onboarding
3. Include expansion discovery in onboarding agenda
4. Notify account executive

### Risks to Flag

1. Missing early expansion signals
2. Treating strategic accounts as transactional
3. Delaying upsell motion unnecessarily
